Lab Instructions Week 01: Self-introduction

Fall 2026 • Prof. Tomonori Nagano <tnagano@lagcc.cuny.edu>

In this week's lab, you will record your own self-introduction (in Japanese) and post the video or audio on this page.

Discuss your name, major, school, hobbies, your home and neighborhoods, and other daily activities you often do. The length of your self-introduction should be at least 30 seconds. This is a model self-introduction: <https://www.youtube.com/watch?v=XwybiV9aiK4>  and the transcriptions for the model self-introduction are provided below. The model presents the bare minimum information for a self-introduction in Japanese. Feel free to add more information as you want.

Use the built-in video recorder (click on "Record Video" below), or use your cellphone and upload your video. The tutor will listen to your self-introduction and share their feedback with you. You will receive a full score (10 out of 10) for submitting your video and will not be penalized for any errors in your presentation.
